Penny-in-Slot WEIGHING MACHINES rebuilt as new

An Investment with Large Profits—and no Risk

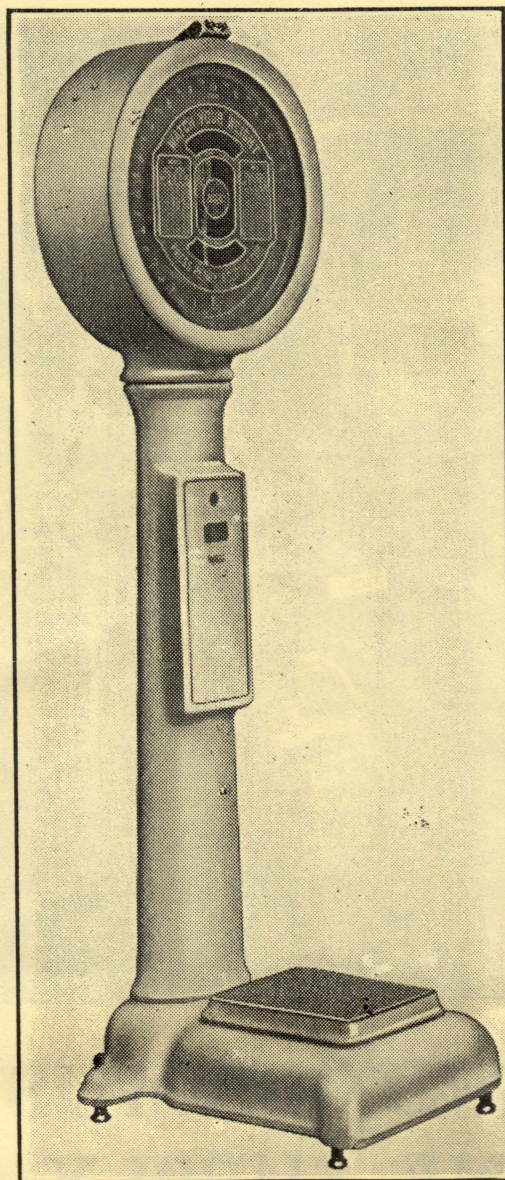

Surely everybody would rather have 25 per cent. for their money than 5 per cent. If you want even 10 per cent. from an average investment you have to take a risk. This can only be eliminated if you are willing to seek a dividend, not only from your money, but from your personal judgment and effort. These machines have hitherto been found chiefly in Railway Stations, and on Seaside Promenades, but returns from hundreds of Weighing Machines in Hotels, Restaurants, Emporiums, Clubs and Pharmacies, indicate that they may be profitable in almost any spot where people pass or assemble.

All that is necessary is to place a Weighing Machine in such a situation, and then for the investor to collect the takings. It is this small amount of effort which makes it possible for the investor to be sure of a minimum of 25 per cent., with, as is quite common, a return of 50 to 100 per cent.

PENNIES
INTO
POUNDS

TONS OF PENNIES

representing thousands of pounds, are collected every month from the Personal Weighing Machines throughout the country. Why? Bodily weight, in the mind of the average person, is closely allied with illness or health, and the public, therefore, are more anxious than ever to take periodic record of their own weight. Of the fair sex this is particularly true. The Powder Puff and the Weighing Machine are two essential features in the life of the modern woman.

A Real Good Legal
Investment.

Theatres,
Licensed
Premises, etc.

Gives no
Trouble.

Needs Little
Attention.

We carry a large assortment of these Weighing Machines. Avery's, Day and Millward's, Jennings', Mills', etc., which we can supply practically at half their cost price, every machine being in perfect order and condition.
